Event Proposal

EXECUTIVE SUMMARY

Objective

Maximize the number of people who come into the Student Union Building.

Goals

Always aim to increase each event's attendance. Each event's attendance should be between 80-100 because this is what we averaged in the past two semesters.

Solution

Each member plans their own event. This strategy was used during Spring 2019 and it had the best overall attendance (533) from all UNI Nights. Therefore, we can implement this strategy again such that we can achieve our objective.

Project Outline

- Student Attendance over the last three semesters
- Event idea 1: Hawaiian Luau
- Event idea 2: Networking Mixer
- Event idea 3: Body Positivity Photo Shoot

NUMBERS

Attendance

This is an overview of Student Programming's attendance from the last three semesters. The first table shows the total number of attendees from each semester. The next three tables list the number of attendees for each event. We can see that from Fall 2018 to Spring 2019 a large increase in attendance occurred; however, from Spring 2019 to Fall 2019 a large decrease in attendance occurred. First, we need to stop and prevent attendance decrease and then we need to focus on consistently increasing attendance.

EVENT 2: NETWORKING MIXER

Overview:

This is a social event where students are free to explore professional's mind. Each "professional" will enter with a specific glow in the dark band and each student will enter with a different specific glow in the dark band. Moreover, every person is given a piece of paper entailing experiences where they must find a person of the opposite color who has done those things. We can have a collection of giveaways for the first 5-10 people who complete the task. For this, we will have to branch out to people outside of the UNM area; however, this will encourage a larger demographic of students.
